

Orma J. Smith Museum of Natural History  $2018\ ANNUAL\ REPORT$ 

THE COLLEGE IDAHO

Year in review July 1, 2017-June 30, 2018

# Mission Statement

The Orma J Smith Museum of Natural History seeks to instill an awareness of the natural world through educational program of The College of Idaho, provide public service, and serve the general and research public by holding in trust collections of zoological, botanical, paleontological, archaeological, anthropological, and other natural history objects for this and future generations. The Museum adds depth and intellectual development to the education of College of Idaho students by making the materials entrusted to it available for classroom, research, and other appropriate educational use. The Museum serves the students and general public by offering tours, interpretive displays, and other educational programs that foster life-long learning by all who visit.

#### Vision Statement

The Orma J. Smith Museum of Natural History will be the premier collections-based environmental education and natural history resource in our region. The Museum's programs and resources will be integrated into the educational programs of the college to help meet the needs of College of Idaho students and provide outreach to the general public.

#### Director's Message

Welcome to this year's Museum Annual Report. I hope you find it interesting and informative. I am happy to be able to report on some of the progress made in the Orma J. Smith Museum of Natural History over this past year. Physical progress includes an increased number of volunteers and volunteer hours donated to the Museum as well as the number of Cofl students using the Museum. Major donations of insect collections added to our holdings. The Evans Gem and Mineral

Collections was officially re-dedicated and is open to the public after a long period of unavailability. Our annual Homecoming Event in the fall showcased the significance of the Cofl Field Biology programs and trips to our lives and to the Museum. We added new staff, including a Museum Assistant and two new curators (in entomology and paleontology). Research progress is shown in a number of scientific publications and new discoveries made by our staff. We constantly strive to improve our integration into the College.

Please join us in celebration of the past field expeditions which helped shape the current Museum and move into the future by attending the College of Idaho Biology Department and Museum related field expeditions at Homecoming, September 13, 2019.

Don't forget to spread your love of the museum and invite someone new to visit in this upcoming year!

William H. Clark, Director

# Our Volunteers

4,000 Plant Specimens

5,240 Cultural Artifacts

10,750 Research Library Holdings

17 New Discoveries via research and within the collections

# Thinking Through Things

For the second year, Gipson Honors students visited the museum several times in conjunction with their fall semester First-Year Seminar (FYS 110). For their final course project, each student chose an artifact or specimen from the museum and researched its meaning through geologic time and across human cultures. Their chosen specimens represented the diversity of the museum collections—a quartz crystal, a manatee skeleton, and a falcon mummy from ancient Egypt among them. In the end, students met the challenge of condensing their full research findings into a single sentence: When you look at this [particular specimen], you see [something!]. The students' insightful, pithy sentences allowed them to articulate their own sense of the significance of their specimen to the universe. Their work culminated in oral presentations in the museum, fully

researched essays, a web site created for each specimen, and an exhibit on the first floor of Boone Hall. See their work at: https://whenyoulook.wixsite.com/yousee/thinking-through-things-1.

### C of I Students Hike with Experts

Inspired by a hike student board representative Aurora Cossairt took with Barbara Ertter and Jan Boles in the summer of 2017, the Museum launched a hiking series with The College of Idaho's Outdoor Program. Three hikes led students into the local area for hands-on experiences learning about paleontology, entomology, and botany. The students really enjoyed being able to ask highly knowledgeable curators questions while hiking the trails. The program is expected to continue.

# Field Trips and Homecoming

Held in mid-September, the Museum participated in a number of Homecoming activities. The annual Night at the Museum event featured a talk entitled "Adventures in Field Studies: The Legacy and Possibilities of Natural

History Field Trips," which included an overview of The College of Idaho field trip legacy and how it has impacted the Museum, the College, and Cofl students by William H. Clark, Rick Williams, and others. Volunteers Steve Bouffard, Wayne Lewis, and Nate Carpenter were honored for going above and beyond in their volunteer efforts. Dr. John Ottenhoff, former Dean and Vice President of Academic Affairs was also presented with the Faithful Museum Advocacy Award.

Additionally, a walking tour of the Luther A. Douglas sand paintings on campus was organized by the Museum. Conda Douglas, daughter of Luther, and Gil Douglas were present

A College of Idaho Homecoming Event

2011 NIGHT AT THE MUSEUM

Adventures in Field Studies: The Legacy and Possibilities of Natural History Field Trips

A collection of Oral and Visual Presentations featuring

Dr. Pat Packard (with some of her students); Bill Clark, Dr. Don Mansfield, and Dr. Jamie Goode

\* Friday, September 15 - 7 to 9 pm

Boone Science Hall - Room 103

\* Presentation of the Orma J. Smith Museum of Natural History Volunteer Awards

\* Silent Auction

\* Bessert and Tours of the Museum in the Basement of Boone Hall following the program

to help with the tours and provide additional information. New information and paintings came of this event.

# Eighteen Years of Becoming a Bugologist

Featuring three ladybug (ladybird beetle) releases, the 18th annual entomological extravaganza saw over 1700 people past the museum booths. The museum provided expert curators to demonstrate the major groups of insects from our collection with emphasis on groups that would be found in Idaho. Entomology curators and staff were on hand to answer questions from the pubic including making identifications of specimens that people brought. The Museum Gift Shop was present with tee shirts, bug nets, books, bug candy and toy bugs for sale. Kids could get their passports stamped by the Gift Shop /Exhibit Area to work towards their certificate in "bugology".

# Museum Sponsors Budding Nature Enthusiasts

For the second year in a row, the Museum has participated in the Deer Flat Master Naturalist program as a sponsoring cohort. The Idaho Master Naturalist Program aims to develop a corps of well-informed volunteers to actively work toward stewardship of Idaho's natural environment. Museum curators gave talks on a variety of topics, hosted a meeting, and provided volunteer opportunities for the enrollees. Idaho Master Naturalists are people who enjoy outdoor recreation, bird watching, identifying plants and animals, gardening, and supporting conservation through volunteerism. Weekly classes were held at the Refuge Visitor Center; natural history field trips were also included.

# Through Rain and Shine, International Museum Day Connects

Hosted at the World Center for Birds of Prey, board chair, Barbara Ertter, board secretary and outreach specialist, Billie Ann Farley, and volunteer Lindsay Woodruff, chaired a table at the Boise Museum Association's International Museum Day event. The event saw over 1200 people pass through, which was rather remarkable as the weather was less-than-favorable. Despite the Museum not being located in Boise, the BMA continues to extend invitations for the Museum to participate in local events such as this, which definitely raises the Museum's profile.

# Tenerating Buzz for a New Pollinator Tarden

The Museum joined pollinator enthusiasts at the grand opening of the pollinator garden at the new Garden City Library. Curator Jim Ryan assisted on the pollinator walk, sharing his insights and expertise on pollinator insects, particularly bees. Meanwhile, Director Bill Clark and Assistant Danielle Lewis manned a museum table, sharing information about the museum, other insects, and even selling a few items. The event was attended by a few hundred people and is expected to continue to grow in the future.

#### Insect Collection Donated to Museum

The Klein family donated 284 Schmitt boxes (small wooden storage and shipping boxes) of insects, mostly butterflies from Dr. Thomas Klein's years of collecting around the world. This collection includes 4,021 fully curated insects, mostly butterflies and beetles. In addition to the insects, collection and curation supplies and field notebooks were included in the highly organized collection. A very valuable aspect to this donation lies in the fact that many of the collections date back a few decades. This means that many of the collection sites are likely highly altered by human impact or gone all together. In other words, the collection localities and habitats no longer have some of these taxa present. So,

the collections make a permanent record of part of the biodiversity of these areas and can be used for future research and study.

### The Long-awaited Evans Collection Reveal

On March 3, 2018, the Evans Gem and Mineral Collections were once more opened to the public. The collections include gem and mineral collections from the Owyhee Gem and Mineral Society, Mr. and Mrs. Earl M. Van Deventer, and Glen L. and Ruth Evans. The collections include educational materials, including rough rock and fossils, early local collection using primitive techniques, and a collection from over 100 countries and almost every state. Over 250 people attended the opening, including James and Richard Weed (whose father was the second curator of the collections), pictured to the left with current curator, Nathan Carpenter.

# Sunny Days and nearly 1,000 Butterflies

The 27th annual Boise Front 4th of July Butterfly Count was held on July 9, 2017 and was attended by approximately 40 butterfly observers/counters from the Orma J. Smith Museum and the general public. With a day of good weather, 987 butterfly individuals were recorded representing 50 different species. That's pretty typical for a "normal" count . Over 27 years the cumulative total now stands at 83 (more than half of Idaho's known butterflies), and the database includes the Western Tiger Swallowtail, which has been found on every count, as well as rare species like the Lustrous Copper, Green Comma and Arctic Skipper, which have each only been observed once. Two other Idaho butterfly counts were also attended by an O.J. Smith representative: one at Yellow Pine

and one in the Seven Devils. Data from all of these counts was sent to the North American Butterfly Association which compiles data from about 400 counts throughout the country each year.

# A New Tome Published for Fish Enthusiasts

Fishes of Idaho: A Natural History Survey is the most recent and comprehensive study of the variety of fish species that inhabit Idaho's waters. An exhaustive natural survey of all species known to exist in the Gem State, this encyclopedic book provides biologists, naturalists, students, and anglers with the most complete reference of its kind. Produced by fish curator Don Zaroban and John Sigler. The book was even mentioned in an Idaho Statesman article.

# A Victural Instany Survey A Solin W. Sigiler Daniel W. Zaroban

#### New Assistant Hired at the Museum

Born and raised in Boise, Danielle attended BSU where she earned a BA in the History of Visual Culture. During this time, she interned at the Boise Art Museum and decided that museums are where her heart is. She continued her studies at the University of Denver. Before receiving her MA in Art History & Museum Studies, she worked at the Denver Art Museum, the Wildlife Experience (now CU South), MCA Denver, and the Denver Museum of Nature and Science. Though she returned to Boise after finishing her coursework, her love for museums never abated and she headed to Los Angeles. After managing the Santa Monica History Museum for over two years, she returned to Idaho, always looking for the perfect museum fit, right here in her home state. She has over 15 years' experience

in curatorial, education, visitor services, and museum administration.

### Welcome New Curators: Kaitlin Maguire & Amy Dolan

Kaitlin received her Ph.D. in Integrative Biology from UC Berkeley, an M.S. in Geology from Ohio University and

her B.S. in Biology from George Washington University. Her research focuses on mammal paleoecology ranging from the Miocene to present but she has also studied flora from the Quaternary and modern landscapes. Her dissertation research focused on Miocene mammals from eastern Oregon, including Succor Creek. For her day job, Kaitlin works for the Idaho STEM Action Center providing professional development for teachers throughout Idaho. She is dedicated to improving STEM education and volunteers with various K-12 schools and secondary institutions inspiring the next generation of scientists.

Amy received her M.S in entomology from Montana State University in 2016. She has a B.S. in biology from Wisconsin Lutheran College and a secondary science teaching certification. As an educator, she's taught in traditional middle schools, an outdoor education center, an Expeditionary Learning high school, and on mountain trails with the Montana Conservation Corps. She currently teaches middle school science at Heritage Community Charter School in Caldwell. As a curator at the museum, Amy has been working on identifying and databasing the Bombus collection, contributing to the PNW Bombus Atlas Project, sharing her love of native bees with the community, and brainstorming ways to use

the museum to support K-12 natural history education in the Treasure Valley.

#### Museum's Sister Institution Celebrates 20 Years

MUSEO DE ARTRÓPODOS DE CICESE turned 20 during the Fall of 2017 and David Ward, William and Mary Clark helped organize and attend the celebration in Ensenada, Baja California, Mexico. Bill and Dave hauled the first load of supplies (entomology cabinets, books, journals, lab and office supplies) to Centro de Investigacion Cientifica y de Educacion Superior de Ensenada (CICESE) the fall of 1997 and the following summer Bill and Mary Clark set the collection up in a room. The collection is now in the Department of Conservation Biology and is actively used by students and researchers and has a full time entomologist on site.
