

# Scholarship Gala

## SHANAYA FOX '21

"I appreciate The College of Idaho for its encouragement in exploration. I have had the privilege of participating in glioblastoma (brain cancer) research as an undergraduate, as well as study two things I am interested in: medicine and the human mind. The courses I have taken truly reflect an interdisciplinary education. What I learn from a psychology course, I have been able to apply to a biology course. I also started diving this year, but I have had no experience in diving before. I was able to start a club through an organization I love, Special Olympics. These are just few of many highlights I have had during my time at C of I, but I feel they encompass the "try everything" attitude of the campus community. I never know what to expect for every term I enter, but I know that I will leave it with a new outlook, whether it is through a club, a class, a project, or an unexpected connection of the three."

"Scholarships are important to me because they are what allow me to be a part of a lively campus as well as pursue my academic passions. Without scholarships, I would not be able to attend this school."

- ▲ **Majors:** Biomedical Sciences and Psychology  
**Minors:** Pre-Medicine and Art & Design
- ▲ **Hometown:** Boise, ID
- ▲ **Interests:** Diving team, Student Ambassador, Pre-Health Professions Club, Academic Support Tutor, Special Olympics Idaho Rhythmic Gymnastics Club, Kappa Kappa Gamma member

*"Walking into an interaction with Shanaya Fox is like entering a peaceful space of reassurance and productive vitality. Whatever Shanaya does, she accomplishes with grace, compassion, and excellence. I have been so fortunate to work with her!"*

-Rochelle Johnson, English and Environmental Studies Professor
